Subject: Upgrade of the PMU financial Management Application from TOMPRO(on-premise) to TOM-WEB or online service

Date: November 25, 2025

The Programme Management Unit of the Ministry of Agriculture for since its establishment had adopted a financial management application named **TOMPRO** developed by a French software developer **DISS – Développement Informatique et Systèmes de Suivi**. Before the deployment of the application to be used by Projects at the PMU, most projects had used Excel for financial reporting to the dislike of their standard reporting requirement. IFAD, AFDB, WB adopted the application for their financial reporting which has since been used by all projects at the PMU. The TOMPRO application is being used by all IFAD sponsored Projects in more than 60 Countries in Africa, Asia, Eastern Europe and the Caribbean. Of recent all IFAD project countries where the on-premise(standalone) applications was being used, have all migrated to the web version. The current StandALONE VERSION AT the PMU is being used by all the Donor-funded projects for their financial reporting such reporting format that also meets the GAC financial reporting criteria. The upgrade to the web version TOM-WEB, based enables finance and procurement to work from anywhere at anytime seamlessly, especially during emergencies like pandemics, where access to the physical offices isn't possible or is difficult. Migrating to the Web-based version, brings about organizational effectiveness and efficiency and will allow finance and procurement teams to work anywhere and anytime with streamlined workflows.

Please accept my high esteem, Honorable Minister for your approval of the contract to enable migrate to the new services.
